

FLYINGGROUP

LEAVE THE MAINTENANCE OF YOUR
AIRCRAFT IN THE HANDS OF SPECIALISTS

DESTINED TO DELIGHT

MAINTENANCE DEPARTMENT

FLYINGGROUP boasts an official EASA Part-145 organization. EASA Part-145 contains the regulations for companies active in aircraft maintenance. Our maintenance department ensures the highest standards of safety and quality in the business. Our Scope Of Work is continuously expanding and updated with new variations, aircraft types and approvals. For the maintenance of the Cessna Citations, our facility provides a high-value stock and tool store for a quick response. Your Falcons are equally in the same good hands. Additionally FLYINGGROUP is an official Williams Service Centre so we can provide the best care for your Williams engines. Under our FAA Repair Station approval we can even attend to your N-registered aircraft.

In the accredited facilities of FLYINGGROUP we have plenty of space for service and maintenance, but no room for error. Needless to say, we only employ top engineers and experienced technical staff to ensure high-level safety.

The aircraft are maintained by a team of motivated and experienced specialists (B1/B2/C), assisted by experienced mechanics (A). Our maintenance crew is available for any line, base or AOG maintenance requirements. With over 20 years of experience as a maintenance organization we are able to provide every aviation service you might need:

Fast and flexible AOG service

Battery and wheels shop service

Aircraft parts stock and direct sourcing

Rental parts at your disposal

Modern infrastructure with 5000m² new hangar floor on the regional airport of Antwerp, Belgium (EBAW), with private lounge for your crew

Aircraft handling and cleaning

Readily available slots at Antwerp airport, which allows for full flexibility regarding arrival or departure times (within the operation hours of the airport)

Approvals held:

Cessna Citation Mustang (510)

Cessna Citation Jet (525, 525A, 525B, 525M2)
